

Distributor Brief

Changes made to solid wires in the High Strength Steel range

Please be aware that the names of the high strength wires are changing. We are replacing the product code in the name with numbers indicating the yield strength of the weld metal.

For example OK Aristorod 13.29 will become OK Aristorod 69 (ie 690MPa yield strength).

Item numbers and product do not change.

The name changes will come into force over the coming months.

<i>New name</i>	<i>Old name</i>
OK Tigrod 55	OK Tigrod 13.13
OK AristoRod 55	OK AristoRod 13.13
OK AristoRod 69	OK AristoRod 13.29
OK AristoRod 79	OK AristoRod 13.31
