

## **Distributor Brief Changes to Test Certification**

With immediate effect ESAB UK will now supply consumable certification in line with the rest of ESAB in Europe. Prior to this the certificates were produced from a local system but will now come from the central ESAB Certification System (ECS).

The certificate content will not change, but the format will look different and will be validated by the appropriate QC authority. It will also be referred to as an inspection certificate rather than a test certificate. This nomenclature is in line with that specified in EN10204 that we certify to. See comparative examples attached.

For an intervening period, for new deliveries, certificates will be delivered with goods and will not be available through Partners. Historical certificates will still be available.

If the test certificate gets misplaced please e-mail [central.sales@esab.co.uk](mailto:central.sales@esab.co.uk) with the item number and lot number and you will receive an electronic copy.
